

AI READINESS DIAGNOSTIC · DXC ADVISORYX

MeridianFS Holdings, Inc.

Financial services · 15 June 2026 · Reviewed by Chris Bryson, Senior Partner, DXC AdvisoryX

WHAT WE FOUND

- 1. AI Investment Maturity is the strongest foundation.** MeridianFS Holdings, Inc. scores 61/100 on ai investment maturity (Established). This is the most credible base to build near-term AI value on.
- 2. Governance Posture is the largest gap.** Governance Posture (38/100, Emerging) is the binding constraint. Addressing it is prerequisite to scaling AI value reliably.
- 3. Value-pocket definition needs sharpening.** AI investment converts to outcomes when value pockets are defined at scoping. Prioritizing 2-3 high-confidence processes would lift the production conversion rate.

RECOMMENDED NEXT STEP

APR Discovery engagement focused on governance posture and operational AI scaling. The Discovery would size value pockets, design the sequence to close the governance posture gap, and produce a board-ready roadmap.

Duration: 6-10 weeks. Continue the conversation: Chris Bryson, Senior Partner | christopher.bryson@dxc.com

90-DAY QUICK WINS

- Intelligent Invoice Triage** — AI categorizes and routes invoice exceptions, reducing manual AP team workload. (8-10 weeks, Low effort)
- Customer Support Ticket Categorization and Routing** — AI reads inbound customer tickets, categorizes by intent, and routes to the right specialist team. (6-10 weeks, Low effort)
- Knowledge Base Search Enhancement** — AI improves internal knowledge base search, surfacing relevant content from imprecise queries. (4-8 weeks, Low effort)
